PROFESSIONAL SUMMARY

Enthusiastic software developer with strong proficiency in C, Python, and Java. Skilled in Machine Learning, Data Structures, and Algorithms with a LeetCode rating of 1684. Experienced in developing end-to-end predictive models and building robust backend solutions for data-driven applications.

EDUCATION

CVR College of Engineering <i>B.Tech in Computer Science; CGPA: 9.0</i>	Hyderabad, India Present
Excellencia Junior College <i>Senior Secondary (XII); Marks: 953/1000</i>	Hyderabad, India 2023
Siddhartha High School <i>Secondary (X); CGPA: 10.0</i>	Hyderabad, India 2021

TECHNICAL SKILLS

- **Programming:** C, Python, Java, SQL
- **Machine Learning:** Predictive Modeling, NLP, Data Preprocessing, Feature Engineering
- **Libraries & Tools:** NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn, Power BI
- **Developer Tools:** Git, Vercel, Render, VS Code, IntelliJ
- **Core Concepts:** Data Structures & Algorithms (DSA), OOP, DBMS

PROJECTS

Detection of Ransomware using CPU Data

- Developed a behavioral detection system utilizing machine learning to identify active ransomware threats by analyzing abnormal CPU usage patterns and performance data.
- Engineered a real-time monitoring solution focused on hardware-level metrics to flag unauthorized encryption processes, enhancing endpoint security.

YouTube Comments Analyzer Extension

- Developed a browser-based tool to extract and analyze YouTube comments using Natural Language Processing (NLP) techniques.
- Integrated the VADER lexicon for sentiment analysis to categorize audience feedback into positive, neutral, and negative sentiment clusters.
- Built a data visualization dashboard to provide actionable insights into engagement trends and sentiment distribution.

Compact-Vcs (Mini Version Control System)

- Engineered a functional version control system supporting CRUD operations, rollbacks, and branch management.
- Designed and implemented a centralized database architecture and an interactive user interface for seamless repository management.

CERTIFICATIONS

- **Cisco Data Science Certification:** Skilled in Python, data preprocessing, EDA, and Machine Learning.
- **E-box Certification:** Completed comprehensive coursework and projects in C, Python, and Java.
